◆ WHO ATTENDS

A community worth reaching.

Researchers, open source maintainers, engineers, educators, and the people who decide how organizations invest in data infrastructure.

1/3

Academia & Government

Researchers, educators, PhD students, civil servants, and public sector data teams from universities and institutions across Europe and beyond.

1/3

Tech & Software

Engineers, open source maintainers, startup founders, and data scientists building the tools and pipelines that power modern computation.

1/3

Finance & Industry

Business analysts, quants, industry practitioners, and decision-makers applying open-source data science at scale in production environments.

◆ THE EVENT

Open source compute, in Paris.

Compute! brings researchers, maintainers, educators, and practitioners together to share knowledge and advance the state of the art in open data infrastructure.

Conference tracks

- Open-source AI / ML
- Data visualization & storytelling
- High-performance & distributed computing
- Interactive computing & reproducibility
- Geospatial & instrumentation

Venue — Centre International de Conférences de Sorbonne Université, Paris

- Main theatre — ~500 seats
- Two side stages — ~100 seats each
- 10 sponsor expo booths
- 2 days on-site, November 25–26 2026
- 3 keynotes · 42 talks · 2 lightning sessions

◆ READY TO COME ABOARD?

Let's make this first edition a success. 

Reach out directly or visit the sponsors page — we're happy to discuss custom packages and answer any questions.
